

VELUSE AGENCY STANDARD OPERATING PROCEDURE (SOP)
DEPARTMENT: Growth & Partnerships
SUBJECT: The Affiliate Army & Risk-Reversal Architecture
PURPOSE: To establish Veluse Agency's systematic protocol for acquiring "Lead Getters" (Affiliates) who will advertise our Med Spa AI infrastructure on our behalf. Additionally, this SOP details the "Win-Your-Money-Back" play to liquidate acquisition costs and manufacture viral case studies.

PART 1: THE "LEAD GETTERS" PHILOSOPHY

A true \$100M infrastructure cannot rely solely on the manual output of our own consultants. To achieve maximum leverage, we must acquire "Lead Getters" 1. An affiliate is a Lead Getter—an independent business that tells their audience to buy your stuff 2. They own their own businesses, do their own advertising, and offer your services to their engaged leads in exchange for money, free stuff, or both 2, 3.

This creates a scenario with the highest possible leverage: we work once to acquire the affiliate, and their leads continue climbing every single month without us doing any additional work 4.

PART 2: THE 6-STEP AFFILIATE LAUNCH PROTOCOL

We do not wait for partners to randomly refer us business; we manufacture an affiliate army using this militant six-step process 5.

Step 1: Find Your Ideal Affiliates The ideal affiliate already possesses a warm audience full of people exactly like our ideal Med Spa clients 5. To find them, we must constantly ask: "Who's got my leads?" 6. We categorise and build a hit list of businesses that service our exact demographic: software providers for clinics, medical equipment reps, aesthetic training academies, and high-end commercial real estate brokers 6.

Step 2: Make Them an Offer Affiliates are essentially a second tier of customers, and you must make them a Grand Slam Offer so good they feel stupid saying no 7. We do not just ask for a favour. We present a money-making offer that hits the core elements of value: *"We will help you make more money from your current customers (Dream Outcome) with a high chance of working since they already need this AI infrastructure (Perceived Likelihood)... without you needing to build, deliver, or provide customer support for the software yourself (Effort & Sacrifice)... so you can start selling it tomorrow (Time Delay)."* 8.

Step 3: Qualify Them Potential affiliates only become active affiliates when they are fully invested 9. We force them to win by making them invest their time, their money, or in the product itself 9. We achieve this by either making them a customer first (if they do not believe in the product enough to buy it, they should not sell it) or making them an expert 10. We charge an onboarding or certification fee—typically 10% to 20% of what an average active affiliate makes in their first 12 months—to certify them as a product expert, which covers our advertising costs and guarantees they pay attention 11.

Step 4: Compensate (Figure Out What To Pay Them) We do not blindly give away our entire profit margin. We establish our maximum allowable Cost to Acquire a Customer (CAC) and deploy a three-tier payout structure to incentivise activation 12.

- **Tier 1 (Sign Up - 25% of CAC):** Paid out for simply agreeing to the terms and completing certification 12.
- **Tier 2 (Activation - 50% of CAC):** Paid out when they actually execute a launch or specific promotional posts 12.

- **Tier 3 (Sustained Performance - 100% of CAC):** Reserved exclusively for affiliates who maintain a high volume (e.g., maintaining five active Veluse Agency clients per month) 12. By tiering the payouts, our blended average CAC drops significantly, meaning our Lifetime Gross Profit to CAC ratio dramatically improves 13.

Step 5: Launch (Get Them Advertising) To activate the affiliate, we must deliver a fast win and an influx of cash 14. We deploy the "whisper-tease-shout" launch method, equipping the affiliate to advertise our lead magnet or core offer to their audience *before* it is fully available to build immense pent-up demand 14. They do the advertising, we capture the engaged leads, and everyone gets paid 15.

Step 6: Integrate (Keep Them Advertising) A launch is a one-time event; integration creates enduring lead flow 15, 16. We systematically weave our Veluse Agency infrastructure into the affiliate's core business using one of three levels of integration 15:

1. **They Give Away Our Lead Magnet:** The affiliate includes our free AI audit with every purchase of their own core offer, making their package more valuable at no cost to them 17.
2. **They Sell Our Lead Magnet:** The affiliate sells our initial front-end service (e.g., a discounted AI implementation blueprint) and keeps 100% of the cash, turning all their customers into our highly-qualified leads 18.
3. **They Sell Our Core Offer:** The affiliate sells our ultimate high-ticket 'Done-For-You' infrastructure directly to their audience, and we simply split the revenue 16.

PART 3: THE "WIN-YOUR-MONEY-BACK" ATTRACTION PLAY

To rapidly acquire highly committed Med Spa clients and manufacture viral marketing assets, Veluse Agency deploys the "Win-Your-Money-Back" scholarship offer 19, 20.

The Psychological Framework: This is the ultimate performance-based attraction offer 19, 21. We require the Med Spa to pay our full high-ticket fee upfront for an initial 6-week or 12-week infrastructure sprint 20. However, we set a rigorous, specific goal (e.g., generating \$50,000 in new cash collected via our AI booking bot). If the Med Spa hits the exact target, they win their entire investment back 20, 22.

The Conditions & Execution: In exchange for the opportunity to win their money back, the client must agree to strict conditions 22. They pay for absolute accountability. If they miss their onboarding calls, fail to implement the provided scripts, or deviate from the SOPs, the guarantee is voided 22, 23. If they *do* achieve the goal, we demand full rights to use their "before and after" revenue metrics and video testimonials to market Veluse Agency 20.

The Rollover Upsell (The Real Monetisation): We do not deploy this play to work for free; we deploy it to force Ascension. If a Med Spa hits the target and earns their money back, we rarely send the cash back to their bank account 22. Instead, we immediately deploy a "Rollover Upsell" 19, 24.

We approach the victorious client and state: *"You just made an extra \$50,000 using our system, and you've won your \$10,000 investment back. Instead of wiring this back to you, we can apply that exact \$10,000 as a fully paid credit towards your 12-month Continuity Maintenance Programme, completely waiving your software and management fees for the next year"* 20, 24.

The client happily rolls their initial investment into our long-term continuity ecosystem, and their resulting viral case study attracts 10x more high-ticket clients into the Veluse Agency pipeline 20.
