

VELUSE AGENCY STANDARD OPERATING PROCEDURE (SOP) DEPARTMENT:

Executive Strategy & Enterprise Acquisition **SUBJECT:** The Live Event / Mastermind

PURPOSE: To establish Veluse Agency's definitive protocol for architecting, hosting, and monetizing elite in-person workshops for 7- and 8-figure Med Spa owners. This is not a seminar; it is a highly structured, paid qualification process designed to deliver massive upfront value while serving as the primary conversion engine for our \$90K+ AI-infrastructure partnerships.

PART 1: THE MONETIZATION FRAMEWORK (THE PAID INTERVIEW)

Amateur agencies conduct free strategy sessions to try and close enterprise clients. At Veluse Agency, we weaponize our authority by flipping the power dynamic: we make the prospect pay for the interview 1.

Our live event monetization is broken into a strict two-tier ascension model:

- **The Front-End (\$5,000 Workshop):** This is a highly selective, two-day event requiring a mandatory screening call to ensure the Med Spa is doing a minimum of \$1M to \$3M+ in annual revenue 1, 2. Charging \$5,000 secures immense financial commitment from the prospect while offsetting all event acquisition costs 1.
- **The Back-End (\$35,000 to \$90,000+ Mastermind/Partnership):** The true purpose of the workshop is to operate as a continuous, high-priced due diligence mechanism 3. During the event, we identify which Med Spas are primed for our highest-tier AI-infrastructure deployment and pitch them a \$90,000 intensive partnership 4, 5.

If they buy the backend, we extract massive enterprise value. If they do not, we still generated \$150,000+ in front-end revenue from 30 attendees paying \$5,000 each.

PART 2: ROOM DYNAMICS & THE "NO TECH" MANDATE

The environment of the workshop dictates the perceived value of the information. We do not throw massive, flashy events with thumping music and guest speakers. Our workshops are positioned as tactical interventions for serious founders 2.

1. The "No Laptops or Cell Phones" Rule: To create an intimate environment fully optimized for learning, we strictly prohibit laptops and cell phones in the workshop event space 6. Security will enforce this at entry checkpoints 7. By removing digital distractions, attendees are forced to be entirely present, which instantly elevates the perceived authority and exclusivity of the room.

2. Eradicating the "Rah-Rah" Motivation: There are no motivational speeches, no cameras, and no audience 4. The workshop focuses exclusively on business fundamentals and objective truths 8, 9. It is an objective kick in the ass that strips away the founder's emotional attachments to their current operational bottlenecks 10.

3. The Spotlight Dissection: The core of the room dynamic revolves around the "spotlight sessions." We place 30 serious founders in a room and publicly dissect and rebuild their business models in front of the group 4, 11. Watching elite operators get torn down and reconstructed creates a shared vulnerability and immense trust in our executive team's competence.

PART 3: THE 48-HOUR CURRICULUM ARCHITECTURE

To deliver six figures of perceived value and successfully pitch a \$90K backend within 48 hours, the event curriculum must be surgically choreographed.

Day 1: The Framework & The Seed Pitch

- **Morning/Afternoon:** Day one introduces our proprietary evaluation frameworks and provides the attendees with a rigid checklist for increasing their company's value 12. We show them the theoretical gaps in their business.
- **The Evening Seed:** At the end of the first day, the lead executive delivers a presentation that seamlessly transitions into a seed pitch for our high-ticket backend program (the VAM Level 2 / Partnership) 13, 14.

Day 2: Execution & The Meta-Lesson Close

- **The Expert Roundtables:** The attendees are split into groups of about ten 14. They rotate through roundtable discussions with our departmental subject matter experts (Head of Marketing, Head of AI-Ops, Head of Sales) 15, 16. Each founder presents their specific constraint, and our team provides tailored, expert advice 14.
- **The Meta-Lesson (The Final Pitch):** At the very end of the second day, the lead executive returns to the stage to give a presentation on handling sales objections 16. This is actually a highly sophisticated meta-lesson. As you teach them how to overcome their own patients' objections, you systematically dismantle their exact psychological objections to buying your \$90K backend program 13, 16. It serves as a powerful, secondary pitch for anyone who did not buy on Day 1 16.

PART 4: ELIMINATING OVERWHELM (THE 3-5 STEP MANDATE)

The single fastest way to guarantee structural churn and kill a high-ticket upsell is by overwhelming the prospect. The number one reason people cancel programs or communities is overwhelm 17, 18.

If you give a Med Spa owner 100 new tasks, they will leave the event paralyzed. At Veluse Agency, we operate on the principle of providing value per second, not seconds of value 18. Simplicity is the ultimate sophistication in business—it makes marketing, selling, and delivery drastically easier 19.

Therefore, the final output of the 48-hour intensive is strictly limited. The attendee does not leave with a binder of homework; they leave with a personalized scaling packet containing exactly **three to five clear, actionable next steps** 15. These steps are specifically designed to break past their single greatest current business constraint 15.

By providing profound clarity rather than a mountain of busywork, we prove that we are the absolute authorities in Med Spa scaling. The prospect realizes they have the roadmap, but they lack the internal infrastructure to execute it—making our \$90K "Done-For-You" backend the only logical conclusion.
