

VELUSE AGENCY STANDARD OPERATING PROCEDURE (SOP) DEPARTMENT: Sales & Revenue

SUBJECT: Risk Reversal & The Guarantee Manual

PURPOSE: To systematically eliminate the single greatest objection in high-ticket sales: risk

1. By shifting the burden of risk from the Med Spa owner onto Veluse Agency, we lower their action threshold and dramatically increase conversions
- 2, 3.

PART 1: THE 5 PILLARS OF RISK REVERSAL

The core formula that gives any guarantee teeth is a conditional statement: "If you do not get X result in Y time period, we will Z" 4. Alex Hormozi's framework categorizes risk reversal into four overarching types of guarantees, along with a fifth strategic multiplier 5, 6:

1. **Unconditional Guarantees:** The strongest guarantee, acting as a trial where the client pays first and can request a refund for any reason 7.
2. **Conditional Guarantees:** Guarantees that include specific "terms and conditions" the client must meet, matching their financial investment with an equal psychological commitment to do the work 8.
3. **Anti-Guarantees:** Explicitly stating that all sales are final, using a creative and compelling "reason why" to demonstrate the proprietary value of the service 9.
4. **Implied Guarantees:** Performance-based offers (like revenue-share or profit-share) where compensation only occurs if the agency performs 9, 10.
5. **Stacked Guarantees:** The advanced strategy of offering a conditional guarantee alongside an unconditional one to completely break the prospect's risk threshold 3, 6.

PART 2: THE EXACT WORDING & SCRIPTS

1. The Unconditional Guarantee Framework An unconditional guarantee should never use "vanilla" wording like "30-day money-back guarantee" 11. We must use creative imagery or position it as an "informed decision" to remove sales pressure 11, 12.

- *The "Informed Decision" Script:* "I'm not asking you to decide yes or no today... I'm asking you to make a fully informed decision, that is all. The only way you can make a fully informed decision is on the inside, not the outside... For any reason whatsoever, if you want your money back you can get it because I only want to keep your money if you're happy" 12.
- *The "Creative Imagery" Script:* "In 30 days, if you wouldn't jump into shark infested waters to get our product back, we will return every dollar you paid" 11.

2. The Conditional Guarantee Framework This requires the Med Spa owner to prove they put in the effort. It is a "better than money back" guarantee because it forces them to achieve the outcome 8.

- *The Script:* "If you do not achieve X result in Y time period, we will Z: give a refund/work for free, provided you have completed Condition 1, attended Condition 2, and utilized Condition 3" 4, 13.

3. The Anti-Guarantee Framework Used for highly proprietary systems or incredibly exclusive access where a refund policy would expose the agency to theft or low-quality clients 9, 14.

- *The "Exposure" Script:* "We have an 'all sales are final' policy, but that is because our product is so exclusive and so powerful that once used it cannot be unused" 15.

- *The "Self-Starter" Script:* "If you're the type of customer who needs a guarantee before taking a jump, then you are not the type of person we want to work with. We want motivated self-starters who can follow instructions and are not looking for a way out before they even begin. If you are not serious, don't buy it" 14.

PART 3: STRUCTURING THE "WORK FOR FREE" (SERVICE) GUARANTEE

The "Service Guarantee" (Get results or we work for free) is one of the most powerful risk-reversals in existence because it eliminates the element of time and guarantees the ultimate outcome, meaning you are never at risk of actually losing the collected money 16. However, to protect Veluse Agency's profit margins and operational bandwidth, this must be structured perfectly:

1. Tie the Guarantee to Key Actions (Conditions): To ensure we do not waste free labor on uncooperative clients, make the ongoing service conditional on them executing the key actions linked with success 16. For a Med Spa, this means: "We will keep working for you free of charge until you hit your goal, *provided* you respond to our team within 24 hours, utilize the exact AI scripts we provide, and attend all weekly onboarding calls" 13, 16.

2. Cap the Downside (The Modified Service Guarantee): If indefinite free work poses an existential threat to agency margins, utilize a "Modified Service Guarantee." Instead of being on the hook forever, you offer them another specific "Y-long period of service" (e.g., an additional 12 weeks) free of charge 17, 18. This keeps the agency responsible but establishes a finite boundary on free labor 18.

3. Trust the Gross Margin Math: Do not make emotional decisions about guarantees; rely on the math 19. The purpose of a radical guarantee is not to have the craziest offer, but to maximize net conversion 20. If a "work for free" guarantee increases our closing rate so that we secure 130 sales instead of 100, even if the failure/refund rate doubles from 5% to 10%, Veluse Agency still nets 117 sales compared to 95 5, 19. The massive influx of high-ticket cash on the front end will overwhelmingly cover the fractional cost of fulfilling the extended service for the minority who require it 19, 21.
