

## VELUSE AGENCY STANDARD OPERATING PROCEDURE (SOP) DEPARTMENT:

Operations & Scaling **SUBJECT:** The \$100M Scaling Roadmap (Stages 0-4) **PURPOSE:** To provide Veluse Agency management and our Med Spa clients with a deterministic, sequential framework for scaling from zero to \$10M+. Scaling is not an art; it is the systematic elimination of constraints at very specific headcount and revenue milestones.

## THE PRE-REQUISITE TO SCALE: THE "1-1-1" RULE

Before detailing the stages, we universally enforce the "1-1-1 Rule" for any business generating under \$1,000,000 per year: You must sell **one product**, to **one avatar**, on **one channel** 1-3.

Attempting to scale by offering multiple services to multiple different types of clients creates the "help everyone issue," which destroys operational efficiency and prevents you from mastering a single conversion mechanism 1, 4. You do not add a second channel or a second product until you have reliably crossed the \$1M annual run rate 5, 6. *Exception:* Local brick-and-mortar clinics in small "C or D" markets (populations under 50,000) may require multiple marketing channels early on just to reach sufficient volume 3.

## STAGE 0: IMPROVISE (\$0 - \$1M)

**Org Chart / Role:** Headcount of 1. You operate entirely as a "Researcher" 7.

- **The Primary Constraint:** You have an idea, but no actual business; you lack market validation and do not know if people actually want what you are offering 8, 9.
- **Graduation Requirements:** You must get people to try your product or service for free 7. You officially graduate from Stage 0 when people are actively using your free offering, providing positive feedback, and returning for more, proving you have something worth charging for 10, 11.

## STAGE 1: MONETIZE (\$0 - \$1M)

**Org Chart / Role:** Headcount of 1. You operate as a "Starter" 12.

- **The Primary Constraint:** The business makes no money, and your "Version 1" (V1) product isn't quite refined enough to convince people to hand over their credit cards 12, 13.
- **Graduation Requirements:** You must make your first consistent sales to different customers 12, 14. You graduate when people are willingly paying your prices, you are tracking your money, you deeply understand what the customer wants, and you have basic systems in place to begin advertising 14.

## STAGE 2: ADVERTISE (\$0 - \$1M)

**Org Chart / Role:** Headcount of 1 (potentially 1-2 as you maximize personal capacity). You are the primary rainmaker.

- **The Primary Constraint:** Nobody knows you exist 15. The business relies on sporadic word-of-mouth and lacks a repeatable customer acquisition model 16.
- **Graduation Requirements:** You must implement initial lead generation systems and establish a repeatable customer acquisition engine 16. At this stage, you enforce the "Rule of 100" (e.g., 100 cold reach-outs, 100 minutes of content creation, or

\$100/day in ad spend) every single day to maximize your personal advertising capacity 17.

### STAGE 3: STABILIZE (\$1M - \$4M)

**Org Chart / Role:** Headcount of 1 to 4 18. You are transitioning from doing everything to having a small foundational team.

- **The Primary Constraint:** The system is choking on volume. People aren't buying fast enough (poor cash conversion cycle), you are wasting time talking to bad leads, you don't have enough time to speak to the good leads, and customers feel lost post-purchase because fulfillment relies entirely on founder magic 18.
- **Graduation Requirements:** You must build core operational systems, define Standard Operating Procedures (SOPs), and remove the daily dependence on the founder for execution 16.

### STAGE 4: PRIORITIZE (\$5M - \$9M)

**Org Chart / Role:** Headcount of 5 to 10 employees 19. You now operate purely as a "Manager" overseeing your frontline team 19.

- **The Primary Constraint:** Growth introduces complex new problems 16. Because you've learned to sell, you are getting too many unqualified leads and saying "yes" to anyone who will pay 19, 20. Servicing these infinite avatars pulls your product direction in too many conflicting ways, creating a bloated, customized nightmare that kills margins 19, 21.
- **Graduation Requirements:** You must relentlessly focus resources on the single greatest constraint limiting your growth 16. To graduate, you must specialize your product and price to serve a newly niched-down avatar 19, 22. You must create better free content/creative to boost overall volume, while simultaneously adding strict qualifications and "friction" to your funnels so that the extra volume self-selects, weeding out bad leads before they hit your sales team 19, 22, 23.
